

JESEENA GEORGE

QA Engineer — Manual, Automation & API Testing

Ernakulam, Kerala, India | +91 9061426544

Email: jeseenageorge4@gmail.com | LinkedIn: linkedin.com/in/jeseena-george-qa

PROFESSIONAL SUMMARY

QA Engineer with 1+ year of dedicated software testing experience, specializing in WordPress/WooCommerce plugin testing, SaaS web application testing, and frontend template validation. Skilled in functional, regression, exploratory, UI/UX, cross-browser, and API testing using Postman. Proficient in test case design, defect tracking, SQL-based database validation, and Agile/STLC workflows. Katalon Practitioner Certified, with active hands-on learning in Playwright and AI-driven test automation.

CORE COMPETENCIES

- Manual Testing, Automation Testing, and API Testing
- Functional, Regression, Smoke, Sanity, and Exploratory Testing
- UI/UX, Cross-Browser, and Responsive Testing
- WordPress and WooCommerce Plugin Testing
- SaaS Application and Healthcare Workflow Testing
- Test Case Design, Execution, and Documentation
- Defect Tracking and Bug Reporting
- Database Validation using SQL
- Agile, SDLC, and STLC Methodologies
- AI-Assisted Testing Workflows

TECHNICAL SKILLS

Testing Tools: Postman, Selenium, Katalon Studio, JMeter, Playwright (Learning)

API Testing: Postman (Request/Response Validation, Authentication, Workflow Verification)

Database: SQL (Data Validation, Backend Verification)

Bug Tracking and Collaboration: JIRA, GitHub, Trello, Confluence

Platforms: WordPress, WooCommerce, Bootstrap-based Frontend Templates

Methodologies: Agile, SDLC, STLC

PROFESSIONAL EXPERIENCE

QA Engineer — Zennode Technologies, Kozhikode

September 2024 – Present

- Perform functional, regression, exploratory, smoke, sanity, UI/UX, usability, compatibility, cross-browser, responsive, and API testing across Agile release cycles for multiple product domains.
- Test ThemeHigh WooCommerce and WordPress plugins, validating plugin functionality, checkout workflows, compatibility, frontend/backend behavior, and overall product stability.
- Conduct frontend template testing for Bootstrap-based and modern framework-based templates, ensuring responsiveness, UI consistency, cross-browser compatibility, and seamless user experience.
- Validate workflows on DocHours, a SaaS-based clinic management platform, including patient management, appointment scheduling, billing flows, role-based access control, and secure data handling.

- Execute API testing using Postman, covering request/response validation, authentication checks, and end-to-end workflow verification.
- Perform database verification and data validation using SQL to ensure backend consistency and accurate data flow.
- Design and execute test cases, test scenarios, and regression suites; prepare detailed bug reports with clear reproduction steps.
- Manage defect tracking via GitHub and handle QA documentation and sprint workflows using Confluence and Trello.
- Collaborate with developers, designers, and product teams throughout SDLC and STLC processes to improve release quality and testing efficiency.
- Explore AI-assisted approaches in test automation to enhance QA productivity and workflow optimization.

QA Intern — STC Technologies Pvt Ltd, Ernakulam

May 2024 – August 2024

- Built a strong foundation in Manual Testing, STLC, and SDLC methodologies.
- Gained hands-on experience in functional, regression, smoke, and exploratory testing across web applications.
- Created and executed test cases, test scenarios, and test documentation based on project requirements.
- Performed bug reporting, defect tracking, and test execution while maintaining QA documentation standards using JIRA.
- Worked on both manual and automation testing activities, including basic automation concepts and workflows.

Technical Analyst — Activelobby (supportlobby.com), Ernakulam

October 2022 – May 2024

- Managed enterprise-level data migration projects using BitTitan and AvePoint, including mailbox, drive data, and chat history migration from Google Workspace (G Suite) to Microsoft 365 and from on-premise environments to cloud platforms.
- Performed pre-migration assessments, planning, execution, and post-migration validation to ensure data integrity and successful workload transitions.
- Provisioned and configured cloud infrastructure on Microsoft Azure and Oracle Cloud, including virtual machines and instances.
- Troubleshoot migration failures, permission conflicts, synchronization issues, and connectivity problems across hybrid environments.
- Created technical documentation, migration procedures, and project handover materials for internal and client teams.
- Collaborated remotely with distributed teams and supported clients across multiple time zones, ensuring smooth project execution and timely issue resolution.

CERTIFICATIONS

Katalon Practitioner Level Certification — Katalon

Issued: September 2025 | Expires: September 2027 | Credential ID: 68d533c6317f3

EDUCATION

Bachelor of Technology (B.Tech), Information Technology

Viswajyothi College of Engineering and Technology

2016 – 2020

ADDITIONAL ACTIVITIES

- **Independent Testing:** Performing hands-on functional and security testing of WordPress and WooCommerce plugins to identify usability, compatibility, and security issues.
- **Crowd-testing:** Active QA tester on the Test IO platform, contributing to real-world web and mobile application testing projects.
- **Continuous Learning:** Exploring practical applications of AI-powered tools and workflows to improve software testing efficiency, automation, and QA processes.
